

Local Emergency Planning Committees Level of Response Questionnaire

The State Emergency Response Commission (SERC) is continuing to update its list of local response levels and capabilities. In doing so, we ask your cooperation in completing this brief questionnaire. The information will be shared with all Local Emergency Planning Committees (LEPCs) to help facilitate coordinated response efforts.

County: Carson City

OVERVIEW

Swarovski Window Mount - For extremely fast viewing while in your car or truck, us the Swarovski window mount with your favorite spotting scope, camera or other optical equipment. The compact ball head design doesn't have any handles to interfere with you or your optics. All you need to do is set the tension so your optics stay in place, but are still moveable and you're done. The standard 1/4x20" threads will work with pratically any item that has tripod threads such as cameras, spotting scopes, and binocular tripod adapters. Made from anodized aluminum, the Swarovski Window Mount is made to last. Firmly attaches to any vehicle window for steady viewing platform

Will work with any tripod adaptable accessory

Includes one window mount

The Arca-Swiss-compatible VEO 2 BH-50WM Window Mount is designed for both outdoorsmen and photographers to use from the comfort of their car. The ball head is ideal for using a spotting scope to observe your surroundings, as well as photography and videography with your mirrorless/DSLR camera.

Features:

- Ball head with a removable telescopic pan handle for maximum versatility (spotting scopes, photography, or video)
- Long Arca-Swiss-compatible (QS-61P) quick-release plate for use with spotting scopes/camcorders
- Spotting scopes with Arca-Swiss-compatible bases (such as the Endeavor HD) can be used without the need for a quick shoe for maximum stability
- Maximum load capacity of 11 pounds. Weighs 1.4 pounds

Product Description

84382911338

Head to your spotting location with confidence knowing you have a high-quality tripod! The Vortex Radian Carbon Fiber Tripod is always on a solid foundation because of its ability to adjust with +/- 15 degrees. Additionally, the carbon fiber legs find a comfortable balance of durability and are lightweight. Although the Vortex Radian Carbon Fiber Tripod is lightweight, it is still able to hold up to 44 pounds!

Features:

- Rubber Feet: Provide solid footing on slick surfaces.
- Spiked Feet: included spiked feet ensure a non-slip grip.
- 44 lbs. Max Load: Perfect for large binoculars, spotting scopes, and rifles.

PRODUCT DESCRIPTION

The ME 1.7x magnification extender increases the magnification by a factor of 1.7. You can quickly and easily attach it using the bayonet catch to all the objective and eyepiece modules in the ATX / STX / BTX family. In the case of the BTX 65 and 85, the magnification increases from 30x to 50x, and from 35x to 60x for the BTX 95 and 115.

Terms and Conditions:

- The terms and conditions of this quote are governed by the System Purchase Agreement between Harris Corporation (now L3Harris Technologies) and Nevada Department of Transportation dated 9/13/2018. Please reference MBP# 19824 and contract number P697-16-016, if applicable.
- Storing battery packs is not recommended because the chemicals in the battery degrade over time and this affects the functionality of the battery. Improper storage of batteries may void warranty.
- Pricing does not include installation, programming, taxes or shipping (if applicable), unless otherwise noted. These items may be waived based on the terms and conditions which are applicable to this quote (Item 1) and could be subject to change.
- If applicable, invoice will be provided for equipment and P25 Programming, at time of material delivery. P25 programming may be completed later, during cutover to P25 System.

Purchase Order requirements:

Purchase Order issued to L3Harris Technologies - PSPC - 221 Jefferson Ridge Parkway - Lynchburg, VA 24501

The Purchase Order should include the following references:

Must include Quote Name and Date. If applicable, include MBP#.

All orders must contain valid model number, quantity, and price for each item.

Frequencies must be supplied with order if applicable.

Requested Delivery Date; If related to Grant Funding, important to provide Grant name, Agency, deadline and product receipt deadline, when applicable.

Shipping will default to Best Way ground, unless otherwise specific. Special shipping/delivery instructions (ex. Delivery lift gate required?) must be noted if applicable. Non Standard packing will be billed to the customer.

Bill to and Ship to addresses along with contact information must be included. Provide customer account number if readily available.

L3Harris DUNS#: 101474992; CAGE Code: 1PNR4; Tax ID 34-0276860.

NOTES & DISCLAIMERS

Thank you for this opportunity to quote. We are pleased to offer requested items below. If you have any questions, need additional information, or would like to place an order, please contact your Customer Service Rep as noted above.

Safety Warning Notice: Products offered, sold, or invoiced herewith may have an applicable Safety Data Sheet (SDS) as prepared by the manufacturer of the product. Any handlers or users of product should refer to applicable SDS prior to handling or utilizing the product. Applicable SDS are included with shipment of products. For other important product notices and warnings, or to request an SDS, please contact Curtis or visit <https://www.incurtis.com/product-notices-warnings>

Transportation is included in below pricing.

Terms and Conditions:

1. The terms and conditions of this quote are governed by the System Purchase Agreement between Harris Corporation (now L3Harris Technologies)
2. Storing battery packs is not recommended because the chemicals in the battery degrade over time and this affects the functionality of the battery. Improper storage of batteries may void warranty.
3. Pricing does not include installation, programming, taxes or shipping (if applicable), unless otherwise noted. These items may be waived based on the terms and conditions which are applicable to this quote (Item 1) and could be subject to change.
4. If applicable, invoice will be provided for equipment and P25 Programming, at time of material delivery. P25 programming may be completed later, during cutover to P25 System.

Purchase Order requirements:

Purchase Order issued to L3Harris Technologies - PSPC - 221 Jefferson Ridge Parkway - Lynchburg, VA 24501

The Purchase Order should include the following references:

Must include Quote Name and Date. If applicable, include M8P#.

All orders must contain valid model number, quantity, and price for each item.

Frequencies must be supplied with order if applicable.

Requested Delivery Date; If related to Grant Funding, important to provide Grant name, Agency, deadline and product receipt deadline, when applicable.

Shipping will default to Best Way ground, unless otherwise specific. Special shipping/delivery instructions (ex. Delivery lift gate required?) must be noted if applicable. Non Standard packing will be billed to the customer.

Bill to and Ship to addresses along with contact information must be included. Provide customer account number if readily available.

L3Harris DUNS#: 101474992; Cage Code: 1PNR4; Tax ID 34-0276860.

To Whom It May Concern:

This letter confirms that LN Curtis & Sons is the sole authorized distributor of MSA Safety Products, including SCBA, SCBA accessories, TIC, and Globe turnout gear for the Municipal Fire Service Market for the State of Nevada. In addition, LN Curtis & Sons is the only CARE certified MSA SCBA Repair Center for the Municipal Fire Service Market for the State of Nevada.

By way of background, in the fire service / first responder markets, MSA imposes specific requirements upon our distributors, which can result in a small number of distributors authorized to call upon a particular region. We impose these requirements because the equipment we manufacture and sell requires the involvement of partners with special knowledge, training and experience. Accordingly MSA's distributors are obligated to acquire and maintain extensive knowledge, training, and experience necessary to properly educate, assist and service our end user customers before, during and after the sale. MSA's fire service / first responder distributor qualification requirements are likewise intended to ensure the highest possible end user customer experience.

If you desire additional information about MSA, its product lines, or channel partners, please do not hesitate to contact me. Thank you for your interest in our products.

Sincerely,

A handwritten signature in blue ink that reads "Scott McGuire". The signature is written in a cursive, flowing style.

Firefighter Electric Vehicle Emergency Plug

\$849.99

The Firefighter Electric Vehicle Emergency Plug make electric vehicles safe to work around. The ev emergency plug signals to the vehicles software that it is in charging mode which engages parking and brake automatically. This allows first responders to safely work in and around the car without fear it may move on it own.

- One Emergency Plugs fits all types of electric vehicles
- Works on Type 1 & Type 2 electric vehicle charging ports

Additional information and other uses listed below.

Description

How can a firefighter disable electric vehicles? When first responders arrive on scene, they can quickly insert the ev emergency plug into the vehicles charging port to disable any electric vehicle, no training required.

The electric vehicle disabler software communicates with the vehicle and places it in charging mode. This automatically puts the EV in 'Park' and applies the electric parking brake.

It is designed to avoid contact with the vehicles high voltage pins making connection and disconnection safe even when the vehicle is damaged.

- This emergency plug works with both type I & type II charging plugs
- The E-plug is certified and safe to use on all electric vehicle types including cars, busses and truck worldwide

Up to now in emergency situations or even during routine maintenance it was not known how to turn off electric car software reliably. This e-plug can be used for firefighter electric vehicle training so all team members are familiar with its simple testing and use.

Here is some information on settings and other uses.

Opening Tesla charging covers

The E-plug has a function for opening the charging cover of Tesla model electric vehicles. The E-plug sends out this code when the self-test button is pressed to open the cover of the Tesla.

The E-plug self-test green light function

Before use a first responder can test the emergency plug with a simple button. When the light turns green, the test is positive and the rescue personnel knows the unit is safe to plug in and use.

The E-plug 'In use' blue light function

When plugged into an electric vehicles charging port the units light will turn blue when it disables the electric car and can be easily seen from a distance.

The E-plug cannot be locked against removal

Normally when a charging plug is inserted, it will lock itself into place. The E-plug cannot be locked and is therefore always removable. emergency plug electric car disable

The E-plug is firmware update enabled

Because technology moves quickly, the E-plug has the ability to update its software as needed.

Wide-variety of applications

HazMat Response

Similar to when a fire rescue crew arrives on scene, HazMat teams are often called when electric vehicles and their lithium batteries are a risk. Upon arriving the hazmat electric vehicle emergency plug can be used to ensure the safety of team members when working around the electric vehicle.

Police Response

When the police are on scene they can use the emergency plug whether for safety or to ensure a car is 'turned off'. The police disable car electronics anytime they need to ensure a car will not move or leave the scene.

Local Emergency Planning Committee Level of Response Questionnaire

The State Emergency Response Commission (SERC) is continuing to update its list of local response levels and capabilities. In doing so, we ask your cooperation in completing this brief questionnaire. The information will be shared with all Local Emergency Planning Committees (LEPCs) to help facilitate ~~coordinated~~ response efforts.

LEPC: **Storey County**

Date: **1/3/2023**

Name of person completing this questionnaire: **Lara Mather**

1. What is the LEPC's declared Level of Response?

Foam Sealing Plug - Large

SKU: #HMS1500

This football shaped, water-activated polyurethane foam plug acts as a fast acting leak sealant for chemical containment.

PRICE:

\$139.86

QTY: 1

ADD TO CART

DESCRIPTION

Use these large foam plugs as an economical, fast, leak sealing solution for sealing unpressurized pipes, storage containers, rail cars and even boat hulls. Kit includes football shaped plug infused with water-activated polyurethane foam, along with nitrile gloves and instructions for use. Foam plugs are initially pliable so they can be inserted into a damaged surface but quickly expand and harden to seal the leak. Multiple plugs may be used for larger holes.

HAZARDOUS MATERIAL RESPONSE KIT

3007-C-1

Rollover Kit "F"

SKU: #HMS1504

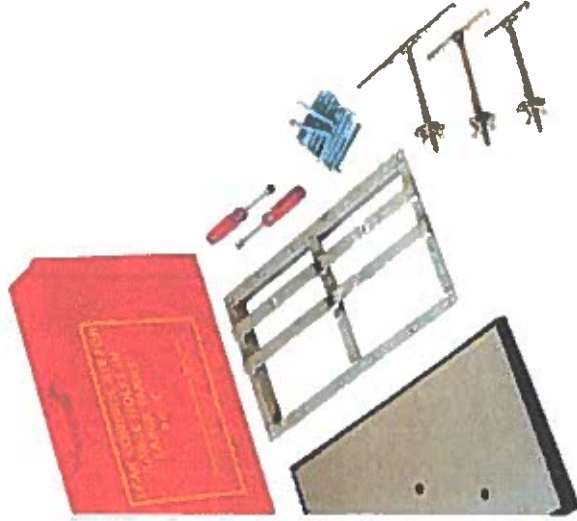

Repair large holes without wrapping chains or cables around the vessel.

PRICE:

\$790.44

QTY: 1

ADD TO CART

DESCRIPTION

The Rollover Kit "F" by Edwards and Cromwell is for large holes in tanker trucks or cars that do not require chains or cables around the vessel. The patch is a neoprene face with stainless steel backing. The support is stainless steel and all "T" bolts are stainless steel. Extra holes are provided in the patch and support unit to leak punctures holes close to obstruction.

Regional Hazardous Materials Emergency Response Plan
Washoe County Emergency Management and Homeland Security Program

LEPC LEVEL OF RESPONSE QUESTIONNAIRE

The State Emergency Response Commission (SERC) is continuing to update its list of local response levels and capabilities. In doing so, we ask your cooperation in completing this brief questionnaire. The information will be shared with all Local Emergency Planning Committees (LEPCs) to help facilitate coordinated response efforts.

County: Washoe

Date: 12/13/2022 Name of person completing questionnaire: Andy Ancho

I. What is the LEPC's declared Level of Response? (mark all that apply)

Terms and Conditions:

- The Terms and Conditions are governed by the agreement between Harris Corporation (now L3Harris Technologies) and Washoe County dated 09/27/2018. Please reference MBP# 19829.
- Storing battery packs is not recommended because the chemicals in the battery degrade over time and this affects the functionality of the battery. Improper storage of batteries may void warranty.
- Pricing does not include installation, programming, taxes or shipping (if applicable), unless otherwise noted. These items may be waived based on the terms and conditions which are applicable to this quote (Item 1) and could be subject to change.
- If applicable, invoice will be provided for equipment and P25 Programming, at time of material delivery. P25 programming may be completed later, during cutover to P25 System.

Purchase Order requirements:

Purchase Order issued to L3Harris Technologies - PSPC - 221 Jefferson Ridge Parkway - Lynchburg, VA 24501

The Purchase Order should include the following references:

Must include Quote Name and Date. If applicable, include MBP#.

All orders must contain valid model number, quantity, and price for each item.

Frequencies must be supplied with order if applicable.

Requested Delivery Date; If related to Grant Funding, important to provide Grant name, Agency, deadline and product receipt deadline, when applicable.

Shipping will default to Best Way ground, unless otherwise specific. Special shipping/delivery instructions (ex. Delivery lift gate required?) must be noted if applicable. Non Standard packing will be billed to the customer.

Confidential, Proprietary, & Competition Sensitive

Tablet Holder

Multi-Port Fast USB Charger

Additional Propeller Blade Set

4 x USB Type-A to Type-C Cable

Hard Case

Limited 1-Year Manufacturer Warranty

Parrot ANAFI USA Overview

*With long-range wireless connectivity, thermal detection, and a 4K camera, the **Parrot ANAFI USA Thermal Drone** is a well-rounded solution for a variety of missions, such as SAR, observation, and inspection. This compact drone features a dual optical 4K camera system, lossless zoom, and 3-axis hybrid stabilization for high-quality capture of long-distance subjects. It also features a FUR Boson thermal sensor to detect 8 to 13 micrometers of JR wavelength for detection in dark or difficult environments.*

The rugged ANAFI USA is made from reinforced carbon fiber and features IP52 certified rain resistance for its 32 minutes offlight time, and it can endure extreme temperatures. It has zero flight limitations and can be set up for use in less than a minute, and it is so compact that it can launch right from your hand. This made-in-the-USA drone features built-in cybersecurity that is NDDA compliant, and its microSD card features 512-bit AES-XTS encryption to keep your imaging data safe. The included Skycontroller 3 can control the drone from up to 2.5 miles away.

Powerful Onboard Camera

The camera features 32x zoom; it can observe people from up to 1.2 miles away.

Thermal Camera

The thermal FLIR Boson 320 camera can detect centimetric hotspots from an altitude of up to 131' and wavelengths between 8 to 14 micrometers. It has hot/cold thermography modes, a 50° field of view, and color and black/white palettes.

Dual Sensor EO Cameras

Two 1/2.4" sensors capture up to 4K video in MP4 video format and JPG/DNG photo formats. The wide sensor has up to a 69/75° video/photo horizontal angle of view, and the telephoto sensor has a 16° video/photo horizontal angle of view.

Zero No-Fly Zone Limitation

The ANAFI USA has no limitations on fly zones and is set up and ready to fly in less than a minute.

Cybersecurity

The ANAFI USA is made in the USA and designed for the US Army. It is NDAA/TAA compliant and Blue sUAS program approved. Full disk encryption of the SD card protects the confidentiality of data stored on the drone, even if it is captured by an adverse party. The network links between the drone and its controller are authenticated and cyphered with WPA2 protection (802.11i standard).

Software Compatibility

The drone is compatible with PIX4Dcapture, PIX4Dinspect, PIX4Dcloud, PIX4Dreact, PIX4Dsurvey, DroneSense, Dronelogbook, Survae, High Lander, QGroundControl, Hoverseen, and Textron Systems third-party software.

Parrot Skycontroller 3

Control the drone from up to 2.5 miles away.

Additional Features

- Photos up to 21MP in JPEG/DNG formats

- GPS, GLONASS, and GALILEO satellite navigation
- 320 x 256 resolution FLIR BOSON IR image sensor
- Up to 32 minutes offlighttime
- Ultracompact and hand launchable
- IP53 certified dust and rain resistance
- microSD card slot for video/photo storage
- Barometer and magnetometer
- Vertical camera and ultra-sonar
- Two 6-axis IMUs, two 3-axis accelerometers, and two 3-axis gyroscopes
- 3-axis stabilization

DJINX7SKNA

DJI Inspire 2 Standard Kit with Zenmuse X7 Gimbal & 16mm/2.8 ASPH ND Lens

BH #DJINX7SKNA • MFR #CP.IN.00000015.01

In Stock

\$7,599.00

Key Features

- Zenmuse X7 Gimbal Camera with 16mm Lens
- Up to 6K Video Recording
- 1/2.8 Aperture
- CineCore 2.0 Image Processing
- Supports CinemaDNG and ProRes Recording
- Dual-Battery Design
- Accelerates to 50 mph in 4 Seconds
- 58 mph Maximum Velocity
- Advanced Obstacle Sensing
- 2-Axis Stabilized FPV Camera

In the Box

DJI Inspire 2 Standard Kit with Zenmuse X7 Gimbal & 16mm/2.8 ASPH ND Lens

Remote Control (Transmitter)

Zenmuse X7 with 16mm Lens

4 x Propeller Pair

2 x Intelligent Flight Battery

Balancing Ring

Limited 1-Year Manufacturer Warranty (Excluding Propellers)

Limited 1-Year Manufacturer Warranty (Flight Battery with Less Than 200 Charge Cycles)

DJI Inspire 2 Overview

With the Inspire 2 Standard Kit with Zenmuse X7 Gimbal & 16mm/2.8 ASPH ND Lens from DJI, you get a complete aerial imaging solution right out of the box. The Zenmuse X7 gimbal offers 3-axis stabilization while its camera captures footage at up to 6K resolution at either 77:9 or 76:9 aspect ratios. In addition to 6K, the camera can record DCI 4K at 30 fps, and UHD 4K at a smoother 60 fps. For still image shooting, hi-res 24MP pictures can be taken, and all your aerial footage can be saved on optional microSD or OJI C/NESSED drives. The addition of the 76mm ASPH ND lens delivers an open f/2.8 aperture to accommodate for low-light conditions, or to reduce depth of field for an augmented bokeh effect.

Not all the power to be found in the Inspire 2 is in the recording functionality. OJI beefed up the flight capabilities of the Inspire 2. Able to accelerate to 50 mph in 4 seconds and reach a top speed of 58 mph, the Inspire 2 can follow fast-moving subjects for dramatic sports and action footage. The flight prowess of the Inspire 2 doesn't come at the expense of battery life. With the two included LiPo batteries onboard, up to 27 minutes of flight time can be had on a full charge.

Advanced obstacle avoidance has also made its way to the Inspire 2. Built into OJI's FlightAutonomy system, objects in front of, below, and above the quadcopter can be detected and avoided automatically. The Inspire 2 can even remember flight paths in case of an emergency return-to-home without GPS enabled. What's more, using the onboard 2-axis stabilized FPV camera, the pilot can navigate the Inspire 2 without being limited to the gimbal camera's field of view.

Advanced Obstacle Sensing

Forward and downward vision systems enable the Inspire 2 to detect obstacles up to 98.4' ahead, allowing for protected flight at up to 34 mph at a controllable attitude angle of 25°. Upward-facing infrared sensors scan obstacles 16' above, adding protection when flying in enclosed spaces. Obstacle-sensing systems are active during normal flight, RTH, and all Intelligent Flight Modes.

Spotlight Pro

Spotlight Pro is a powerful tracking mode that allows even single pilots to capture complex, dramatic images. It uses advanced, visual-tracking algorithms to lock onto a subject during flight, regardless of the direction that the Inspire 2 flies, creating shots that would once have required a dedicated camera operator. If the gimbal comes close to reaching its rotation limits, the Inspire 2 itself will rotate in the same direction without affecting flight control or the shot being captured to free up gimbal movement.

Spotlight Pro has two shooting modes: Quick and Composition. In Quick mode, select an object to begin tracking. In Composition Mode, select the subject and the tracking position. When the subject enters the preset tracking position, press the shortcut to begin tracking. The gimbal can be moved during shooting for composition adjustments. Spotlight Pro is available in all Intelligent Flight Modes including ActiveTrack, TapFly, Waypoint, and Point of Interest.

TapFly

The 2-axis onboard FPV camera separates the flight view from the main camera view, effectively giving the Inspire 2 a dedicated "tap-to-fly" camera. Tap a point onscreen in the FPV view to set a flight route and the Inspire 2 will automatically fly along that route, leaving the pilot to focus on gimbal movement.

ActiveTrack

The ActiveTrack Mode allows the Inspire 2 to recognize a range of objects, from people to bikes to cars to boats. Tracking profiles that can be adjusted based on the subject being tracked means greater tracking precision.

Smart Return Home

Forward and downward vision systems allow the Inspire 2 to create a real-time map of its flight route as it flies. If the video transmission system signal is lost and Smart Return Home is enabled, it can fly home along its original route and change to a straight line when it regains a signal. As it returns, it will use the primary camera to identify obstacles as far as 656' in front, allowing it to plan a safe route home. It is also able to reconnect more quickly after losing connection.

Video Transmission System

The Inspire 2 features DJI's Lightbridge technology. This iteration has an effective transmission distance of up to 4.3 miles (under ideal conditions) and can deliver both 1080p and 720p video, as well as the FPV view to the pilot and camera operator. Users can also switch between 2.4 GHz and 5.8 GHz control frequencies to avoid interference for greater signal stability.

Master and slave setups are also supported. The master controller can transmit an HD video signal to the slave controller up to 300' away without image quality loss.

Broadcast Mode

Broadcasters can broadcast direct from the Inspire 2 using its dedicated 1080i50 and 720p60 transmission signal. Aerial live streaming direct to TV is as simple as connecting the Inspire 2 transmitter to the satellite truck.

Powerful Flight Performance

The propulsion system can thrust the Inspire 2 up to 58 mph and allows for descents up to 29 feet-per-second and ascents up to 19 feet-per-second. It can accelerate from 0 to 50 mph in just four seconds and flies at a maximum attitude angle of 40°. The two controller sticks on the transmitter are tuned for more sensitivity, making delicate maneuvers easier.

Dual-Battery Design

Dual batteries mean that, if a problem occurs on one battery, the other can continue flight long enough for a safe landing. At the same time, the Inspire 2 propulsion system is driven by a PWM signal with serial port signal redundancy so that if PWM signals are lost, transmission will continue through the serial port.

Local Emergency Planning Committees Level of Response Questionnaire

The State Emergency Response Commission (SERC) is continuing to update its list of local response levels and capabilities. In doing so, we ask your cooperation in completing this brief questionnaire. The information will be shared with all Local Emergency Planning Committees (LEPCs) to help facilitate coordinated response efforts.

County: White Pine

Date: 11/16/2022

Name of person completing this questionnaire: Brett North

1. What is the LEPC's declared Level of Response?

ProPac Tri-Pac Medical Kit • ProPac USA

MEDICAL EMERGENCY TRI-PAC KIT

800-885-1100

Description

The ProPac Tri-Pac Medical Kit is designed for speed and mobility and includes a comprehensive list of emergency supplies, yet is compact and easy to carry and store.

ProPac Tri-Pac Medical Kit features our Tri-Pac Bag

- Unique 3-way carry: includes carry handle, shoulder strap and backpack style straps
- Soft-side bag has rugged, moisture resistant 600 Denier Nylon canvas covering
- 3 Primary zippered compartments: main, side and end, plus several smaller ones
- 3 Handy sub-kits are contained within removable pouches—they feature clear vinyl sides for quick ID of contents
- Several components are snuggled in place by elastic straps for rapid access
- EMS patch prominently displayed

Because of the size and/or weight of this item, it is not eligible for free shipping.
