I. **GOALS:**

Tell the SERC what you want to accomplish with this grant. **Provide a separate discussion of each goal and justify its need to support preparedness to combat terrorism.** The goals are general statements of desired results and identify intended outcomes the program has established to achieve. Justification to support preparedness to combat terrorism must be addressed.

Goal 1: Increase Operational Coordination capability by strengthening law enforcement's ability to respond to terrorism incidents that require advanced breaching tools and equipment.

Justification: In recent years, law enforcement has seen a nationwide increase in active assailant incidents where the assailant has barricaded doors and entryways to prevent law enforcement entry and the escape of victims. The Lyon County Sheriff's Office (LCSO) is looking to bolster abilities to gain access to through the use of advanced breaching tools, equipment, training and techniques for patrol staff and School Resource Officers (SROs). Recently, the final report of the Uvalde shooting in Texas was released by the United States Department of Justice. The report highlights the successes and failures of the initial response. The report makes several recommendations, some of the most vital ones calling for the rapid availability of breaching equipment and shields for responding officers.

II. **OBJECTIVES:**

How do you plan to achieve the goals listed above? Include specific uses of this grant funding to support preparedness to combat terrorism. Objectives focus on the methods/activities to be used to achieve the goals they support.

Answer these questions in each objective:

- ✓ *WHAT* will be purchased with these grant funds?
- ✓ *WHO* will complete the purchases awarded?
- ✓ *WHEN* will the purchases be made and the activity implemented?

Click inside gray box to begin typing

1. **By December 31, 2024, Lyon County Emergency Management (on behalf of LEPC) will outfit the Lyon County Sheriff's Office with breaching equipment and supplies requested.**
2. **By June 30, 2025, the Lyon County Sheriff's Office will conduct at least 1 drill utilizing the breaching equipment.**

III. **UNITED WE STAND PRIORITIES, (to combat Terrorism):**

Identify how each item (or category of items) requested addresses at least one of the United We Stand, to combat Terrorism priorities.

UWS Priorities.pdf

The following items will provide the Lyon County Sheriff's Office with advanced abilities to respond, coordinate, and communicate during acts of terrorism in Lyon County.

1. **Breach training prop – Operational Coordination:** to train officers on how to use the new tools provided to them to breach doors and windows. The training prop will allow training on techniques for years to come with minimal additional cost and resources needed. With effective training tools, Lyon County will be able to establish and maintain a coordinated operational structure and process in response to an active assailant incident that requires breaching.
2. **Advanced Breaching Kit for Energetic Breaching – Operational Coordination:** With effective tools, Lyon County will be able to establish and maintain a coordinated operational structure and process in response to an active assailant incident that requires breaching.
3. **Armor shields – Operational Coordination:** Provide advanced armor to first-line school resource officers and SWAT teams. With effective armor and personal protective equipment, Lyon County will be able to establish and maintain a coordinated operational structure and process in response to an active assailant incident that requires breaching.
4. **Encrypted radio services – Operational Communications:** With advanced technology, law enforcement can no longer secure sensitive radio communications from online scanner applications. Over the past year, LCSO has had several instances of violent offenders using this technology to run counter-surveillance and attempt to evade LCSO deputies. This technology can be switched on and off during sensitive investigations using encrypted communications.
5. **Breaching tool sets – Operational Coordination:** provides breaching tools for SROs and SWAT to gain entry during active assailant incident response. With effective tools, Lyon County will be able to establish and maintain a coordinated operational structure and process in response to an active assailant incident that requires breaching.
6. **Bolt Cutters – Operational Coordination:** provides breaching tools for SROs and SWAT to gain entry during active assailant incident response. With effective tools, Lyon County will be able to establish and maintain a coordinated operational structure and process in response to an active assailant incident that requires breaching.

Communications Interoperability Questionnaire

SERC policy 8.2 currently requires applications to fund communications equipment be in compliance with the Nevada State Communications Interoperability Plan. To assist in ensuring compliance with this plan, the following guideline questions have been developed. Complete this questionnaire for applications which include communications equipment.

1. Will the equipment requested be used in accordance with the Nevada State Communications Interoperability Plan (SCIP) and applicable Tactical Interoperability Communications Plan (TICP)?

Yes

All funded equipment must be intended for operation within the guidelines of the SCIP and its regional TICPs.

2. Does this request improve interoperable communications?

Yes – Provides secure communications for active assailant response.

Request must advance interoperability, not just provide equipment replacement or expansion. Intercommunication partner agencies beyond the applicant must be identified. Requests for narrowbandin7 upgrades will not be considered.

3. Is the equipment requested legal for sale and operation within the jurisdiction and service intended?

Yes

Radios must be FCC certified and/or type accepted for sale and use in the service intended.

4. Have all appropriate FCC licenses been issued to permit legal operation by this jurisdiction/agency?

Yes

Requestor must demonstrate a valid license for the requested radios, including specific notation for narrowband emission for any radios intended for voice communications.

5. Is the requested equipment P-25 capable?

N/A

Request must be for P-25 capable radios. Actual operation using the P-25 digital mode is not a requirement at this time. Radios that are P-25 "ready" do not qualify if the capability has not been installed.

6. Is the requested equipment complete and ready to use?

Yes – This is a one-time encrypted communications subscription service.

Requested equipment must constitute a complete, functioning unit as purchased. No additional hardware, software or modifications should be necessary to operate the equipment when delivered. This does not mean a radio must be delivered to the requestor pre-programmed in the instance where the requestor has pre-existing programming and configuration tools.
