Unmanned Aerial Systems (UAS/Drones) support counter-terrorism preparedness through surveillance and reconnaissance, as well as by aiding in the detection and mitigation of drone related threats to critical infrastructure. They can be used to monitor potential threat areas, gather intelligence and maintain situational awareness, allowing for proactive measures to be taken. Nye County Sheriff's Office (NCSO) will obtain 3 cost estimates for the desired

UAS hardware, software and services, and handheld thermal imaging monocular spotting scope, selecting the vendor(s) with the lowest, most responsive and responsible bid. Working with Nye County's Purchasing department, NCSO will request a purchase order be issued for the purchase of the UAS hardware, software and services. Upon receipt of the UAS, NCSO will process the invoice for payment and place the UAS system into service with existing NCSO UAS pilot(s). Nye County Grants Administration will submit financial reporting/reimbursement requests to the SERC quarterly and within the grant award period. This purchasing process will be completed as soon as possible after acceptance of the grant by the Nye County Board of County Commissioners.

III. **UNITED WE STAND PRIORITIES, (to combat Terrorism):**

The use of an Unmanned Aerial System addresses all of the United We Stand grant mission area/core capability priorities with the exception of cybersecurity. Drones can be used for surveillance & security, intelligence gathering, threat assessment and response planning. They can be used to track potential threats, monitor suspicious activities of individuals or groups and will provide real time video feed to incident commanders which will enhance situational awareness and allow for more accurate and timely intelligence and information sharing and operational coordination & communications with emergency responders. All of this will enable the incident commander/EOC to provide more accurate and timely public information and warnings during any incident. The thermal spotting scope will be used by individuals on the ground to attempt to locate and track targets identified by the UAS. This capability will be made available to all response agencies and cooperating partners within Nye County and neighboring communities.

IV. BUDGETS:

Please prioritize your request as awards may need to be reduced based on available funding. Do not round the unit prices or the line item totals. Round up the grand total of each category to the nearest dollar.
