

**NRT-1A Checklist**  
**State Emergency Response Commission**  
**Planning and Training Sub-Committee**

County: Lander

Date: 12/04/2025

1. Identify facilities subject to TIER It reporting requirements and identify transportation routes.  
Page# (s): Section 6
2. Describe Emergency Response Procedures to be followed on and off site.  
Page # (s): **Section 2, Annex6, Tab A-F (Hazmat Plan)**
3. Designation of Community Coordinator and Facility Coordinator(s) to implement the Plan.  
Page # (s): **Section 1, Page 20-21**
4. Outline Emergency Notification Procedures.  
Page # (s): **Section 2, Appendix 1, Annex 6, Page 7-8**
5. Describe methods for determining probable affected areas and populations by releases.  
Page # (s): **Section 2, Annex 6, Tab A**
6. Describe Emergency Equipment in the Community and at Facilities and the persons responsible for them.  
Page # (s): **Section 3, Annex 10, Tab A and B**
7. Outline Evacuation Plans.  
Page # (s): **Section 2, Annex 1, Tab B (as provided by State of NV through contractor Ecology and Environment)**
8. Provide a Training Program for Emergency Responders.  
Page # (s): **Section 1, Pages 38 and 39, 45-46, Section 2, Annex 6, Tab D, Page 9**
9. Provide methods and schedules for exercising Emergency Response Plans.  
Page # (s): **Section 1, Pages 38, 39, 45 and 46**

Remarks/Overall Comments:

**No new updates to Hazmat Plan, except for additions to trailer inventories**

NRT-IA Checklist

#3 Section 1, Page 20-21

Submitted on 1/12/26

MeShell Young, LEPC Chair

- Promote public awareness and education to minimize confusion in the community if an incident occurs.
- Develop annual test or exercise of the plan.
  - Establish test / exercise objectives
  - Identify the existing emergency response equipment and personnel.
  - Determine equipment and/or personnel shortages
  - Evaluate process or procedural gaps
  - Conduct a needs assessment of emergency response equipment and personnel and modify plan processes / procedures, as necessary.

**County Director of Emergency Services may (Lander County Sheriff is the designee and the Undersheriff is the designated alternate in the absence of the Sheriff):**

**Preparation/Response:**

1. Be the central point of contact for the plan.
2. Be a member of the LEPC and the designated Community Emergency Coordinator as well as submitting recommendations to the LEPC on various items such as exercises, drills, workshops, and seminars to meet or increase the level of emergency preparedness. Recommend grants to support training and preparedness requirements.
3. Assume the role as the designated Emergency Services Director in accordance with applicable County ordinances.
4. Maintain Title III information files and coordinate public requests for Title III information with the State Emergency Response Committee Administrative Office.
5. Hold, maintain and update hazards and analyses specific to Lander County.
6. Hold, maintain and update the Emergency Operations Plan (EOP) for Lander County and coordinate changes with EOP holders.
7. Coordinate planning function, establish processes, and prepare logistics activities, as needed, to streamline any mitigation actions.
8. Monitor condition of the Emergency Operations Center (EOC) sites and plan for properly equipage, functionality as well as coordinating its actions when activated.
9. Implement Emergency Operations Plan, advise the County Commissioners, as required, and provide follow up notification to the appropriate officials in the event of an incident.

10. Act as a liaison with local, state and federal agencies on behalf of Lander County.
11. Initiate the Emergency Declaration on behalf of the County Commissioners as authorized by the Lander County Commissioners.

**Law Enforcement may:**

**Preparation/Response:**

1. The Sheriff will normally be the Incident Commander and assume control until properly relieved. The IC shall effect overall management and coordination of an incident.
2. Comply with all hazardous materials training requirements and ensure that their personnel receive the mandated levels and types of training.
3. Develop and maintain Standard Operating Procedures (SOP) for Chemical, Biological, Radiological, Nuclear and High Yield Explosives (CBRNE) response. Participate in review of emergency and dispatch response procedures. Participate in interagency training.
4. Develop and conduct training in evacuation procedures. These procedures and training must incorporate volunteers such as Lander County Search & Rescue.
5. Be responsible for evacuation of public. Assign routes from affected areas to designated shelters.
6. Support the Fire Chief in coordinating the containment of a hazardous material incident to the point when fire service assistance is no longer needed at the scene.
7. Perform rescue and first aid, as training and conditions permit. Actions are not to exceed the current level of response personnel training and equipment operation.
8. Maintain cognizance of indications and warnings for potential terrorist or extremist groups through state and federal networks. These indications and warnings will increase vigilance and awareness.
9. Establish incident perimeter, contain area and access control points in conjunction with Incident Commander to protect the public.
10. Perform crowd control in the vicinity of the incident area.
11. Establish evacuation routes and traffic control for staging areas. Re-route vehicle and pedestrian as necessary to facilitate flow.
12. Provide security for critical infrastructure and vital facilities.

*EMERGENCY SERVICES  
ACTION CHECKLIST*

*Lander County,  
Nevada*

*An Emergency  
Procedures  
Guide for Local  
Coordinators*

*Available to the Lander County Dispatch  
to assist with Emergency Actions*

## Checklist Step Index

1. Receive notice/record information.
2. Start an INCIDENT LOG?
3. More emergency management staff?
4. Contact elected official/PIO?
5. Need to shelter people?
6. Notify the State EM Office?
7. Could a school be affected?
8. Could a hospital be affected?
9. Need to notify the media?
10. Issue DISASTER DECLARATION?
11. Should the EOC be activated?
12. Need Amateur Radio Operators?
13. Complete #1-13, tum to HAZARD.

# EMERGENCY SERVICES CHECKLIST

## INSTRUCTIONS:

1. Begin the checklist with item #1 and complete through item #14.
2. Then turn to the specific **HAZARD SECTION (Section 2)** describing the type of incident you are involved with to review resources and agencies that may be required.
3. Use:
  - **Unit Log Sheet (Form 214A/B in Section 4, Annex 12 at the back of book);**
  - **Master Resource List (Section 3, Annex 10, Tabs A and B);**
  - **And, Emergency Declaration Form (Appendix 2 after this checklist), as required.**

**GO ON TO THE NEXT PAGE**

0

RECEIVE NOTICE OF INCIDENT. TRY TO RECORD THE FOLLOWING INFORMATION:

- A. Type of incident
- B. Number of dead/injured
- C. Type/extent of damage
- D. Evacuation/sheltering needed
- E. Possibility of escalation
- F. Incident Commander's name
- G. Command Post location

**GOTO**  
**#2**

DO YOU NEED TO START AN INCIDENT LOG?

**NO!**  
**Go To**  
**3**

**YES!**

Start  
**INCIDENT  
LOG**

**Go to**

**J.**

Begin an **INCIDENT LOG** if you take any actions, including notifications.

Try to keep an accurate time schedule of actions you take, and events as they occur.

Blank **INCIDENT LOG** sheets should be kept with this document.

**INCIDENT LOG sheets are under "ICS FORM 214" Unit Log-Annex 12**

Go onto the next page

DO YOU NEED ADDITIONAL EMERGENCY MANAGEMENT STAFF?

**YES**

**Go to  
4**

**Notify  
Staff**

**Go to  
4**

For large events you may need to call in additional staff, if available.

Name	Phone
Sheriff Ron Unger	W: (775) 635-1100 C: (775) 635-5161
Under Sheriff Robert Quick	W:(775) 635-1100 C: (775) 374-0032
Bert Ramos, Safety Manager	W (775) 635-5595 C: (775) 455-7653

DO YOU NEED TO CONTACT AN ELECTED OFFICIAL/EXECUTIVE OFFICER/PIO?

**YES**

**ltol**

**Contact  
appropriate**

**ltol**

Consider the following information when deciding whether or not to contact the chief elected official/chief executive director of the jurisdiction:

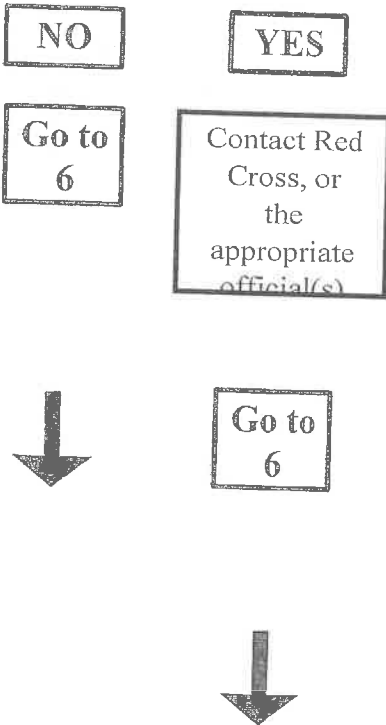

- A. Type of incident
- B. Number of dead/injured
- C. Type/extent of damage
- D. Evacuation/sheltering needed
- E. Political ramifications (schools, terrorists, site)
- F. Possibility of escalation

**The Emergency Services Director (Sheriff) will determine who will be contacted and when.**

Phone numbers for elected officials and Public Information Officers (PIO) are listed below:

Name	Phone
Brian Sparks, County Commission	W: 635-2885
Kathleen Ancho, County Commission	W: 635-2885
J.R Thomas, County Commission	W: 635-2885
Mike Chopp, County Commission	W: 635-2885
Patsy Waits, County Commission	W: 964-2619
Bill Schaffer, District Attorney	W: 635-5195 C: (775)421-6363

DO YOU NEED TO EVACUATE/SHELTER PEOPLE?

If evacuation is implemented, you may need to open a shelter to receive evacuees. You may also need busses to move evacuees. Coordinate efforts with the Incident Commander and/or his designated Operations Section Chief.

**Refer to Section 3, Annex 10, Tab C for detailed shelter information and guidance**

Contact the American Red Cross, or other appropriate agencies to arrange for a shelter(s) to be opened. Contact the appropriate bus service, if needed.

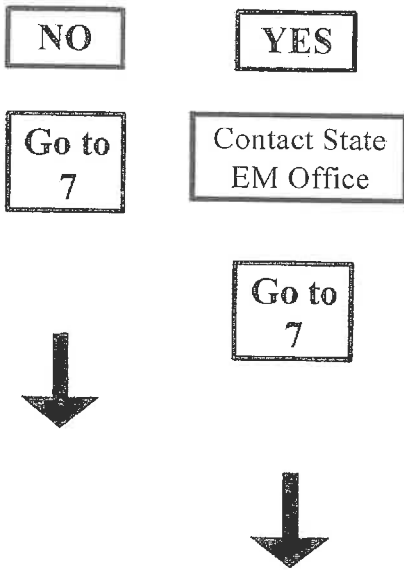

Phone numbers for the Red Cross and other necessary officials are listed below:

Name	Phone
Reno Service Center, American Red Cross <b>Ask for "A Disaster Services Representative"</b>	Office: (775) 856-1000 Cell: (775) 848-2926 800-951-5600 Charlotte Garber
Miranda Hicks, Manager Winnemucca Service Center 3200 Traders Way	W: (775) 625-1155 Fax: (775) 623-8112 H: (775) 623-0179 Cell: (775) 304-0396
Civic Center, Battle Mt.	W: (775) 635-1112 Fax: (775) 635-1113
Lander County School District Transportation - Gordon Hunt	W: (775) 635-2886 / 8745 Cell: (775) 635- 9558
Lander County Senior Center	(775) 635-5311

Note: Disaster housing program **(if a Federal Disaster is declared):**

- **Transient accommodations** (hotels) up to 2 weeks, (may waive for more). FEMA Grant.
- **\$SK quick Home Repair Assistance** (fix house to get you back in). FEMA Grant (don't have to repay).
- **Temporary housing assistance:** Rent money if your house is uninhabitable. Base rate for the area. FEMA Grant.
- **Mortgage and rental assistance.** You must be in foreclosure by the bank because you lost your sources of income as a direct result of the incident, and you cannot pay otherwise.

**DO YOU NEED TO NOTIFY THE NEVADA DIVISION OF EMERGENCY MANAGEMENT?**

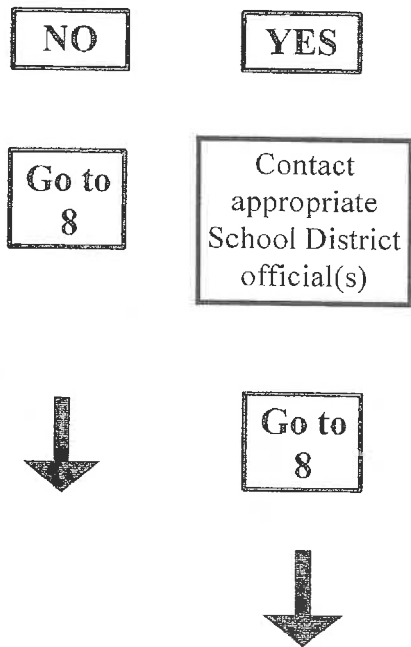

Notify the **Nevada Division of Emergency Management (NDEM)** when the National Guard, State and/or Federal resources are needed:

Name	Phone
State of Nevada, Division of Emergency Management	Emergencies during day: (775) 687-0300 After hours: (775) 687-0400
Operations, State of Nevada, Office of Emergency Management	W: (775) 687-0310 C: (775) 721-5542

The **Nevada Division of Emergency Management (NDEM) Office** can request and provide state and federal resources beyond Lander County's available capabilities. **Requests for additional resources must be coordinated with the Incident Commander or Unified Command to ensure his / her organization is prepared to use them.**

**COULD A SCHOOL BE AFFECTED?**

Notify the Lander County School District if a school could be affected, or is needed as a shelter. Phone numbers are listed below:

**School District Numbers**

Name	Phone
Lander County School District Headquarters	W: (775) 635-2886
Superintendent, Lander County School District	IW: (775) 635-2886
Assistant Superintendent	KV: (775) 635-2886
LC School District Transportation Foreman - Gordon Hunt	KV: 635-2886 / 8745 Cell: (775) 635-9558

COULD A HOSPITAL BE AFFECTED?

**YES**

**,tol**

Contact appropriate hospital(s)

**IG tol**

Confirm that hospital(s) have been notified when there is an actual, or potential, mass casualty incident (5 or more deaths, or injuries requiring hospitalization). Phone numbers are listed below:

HOSPITAL CONTACTS

Name	Phone
Battle Mountain General Hospital	Office: 635-2550
Jason Bleak, Hospital Administrator	Office: 635-2550
LEPC representatives Holly Heese	Office: 635-2550
Brandy Bengoa, Lander County Health Nurse	Office: 635-2386
Austin Clinic	Office: 964-2222

DO YOU NEED TO NOTIFY THE MEDIA?

**NO**

**YES**

**Go to 10**

Notify the Media

**L!Q\_J**

Notify the media at the direction of the Emergency Management Director (Sheriff). **DO NOT NOTIFY THE MEDIA UNTIL DIRECTED.** The IC and/or Sheriff will be consulting **through a Public Information Officer when possible.** When the event is large in size, it has political ramifications. Or, if the situation dictates, you need to communicate with the public (to give emergency instructions, etc.) Phone numbers are listed below:

NAME	PHONE#
Name	Phone
Humboldt Sun	W: 623-5011 Fax: 623-5243
KWNA (AM 1400 / FM 92.7)	W: 623-5203 Fax: 625-1011
KELK (AM 1240)	(775) 738-1240
KLKO (FM 93.7)	(775) 738-1240
KHIX (FM 96.7)	(775) 753-6499
KRJC (FM 95.3)	(775) 738-9895
KTSN (AM 1340)	(775) 738-9895
KHWG (AM 750)	(775) 428-1764
KVLV (FM 99.3 / AM 980)	(775) 423-5858
KOLO (TV Charmel 8 - Reno)	(775) 858-8888
KZTQ (FM 106.1)	(775) 823-1926

SHOULD A DISASTER DECLARATION BE ISSUED?

**YES**

**Prepare the Resolution, obtain appropriate signature(s)**

1

1

Coordinate with the Sheriff. The Sheriff may authorize the dispatcher to a DISASTER DECLARATION on behalf of the County Commission. If the event is large, it has significant political ramifications. Or, if the incident requires, the public may be asked to evacuate or shelter.

Blank STATE OF EMERGENCY and DISASTER DECLARATION forms should be kept with this document.

**See Appendix 2. Ensure blank copies are available in the Emergency Operations Plan. Do NOT USE the original (MASTER) in this Emergency Operations Plan.**

SHOULD THE EMERGENCY OPERATIONS CENTER BE ACTIVATED?

**NO**

fGotoI  
L£J

**YES**

**Begin EOC activation procedure**

fGotoI  
L\_gJ

The **Emergency Operations Center (EOC)** should be activated when the event is large, or multiple political jurisdictions are involved (a Multi-Agency Coordination group is needed).

EOC activation should be approved by jurisdiction Chief Elected Official as soon as possible.

An BOC activation procedure should be kept with this document.

**The disaster On Scene Commander can make the recommendation to activate the EOC. Additionally, contact the County Director of Emergency Services/ Sheriff. See his number and that of the elected officials in Steps 3 and 4 above.**

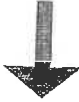

DO YOU NEED AMATEUR RADIO OPERATORS?

NO

YES

Go to  
13

Contact RACES  
personnel

Go to  
13

Amateur radio personnel may be used to communicate between certain locations such as the event site and the hospitals, shelters, and the Emergency Operations Center.

The local area ARES/RACES resides in Humboldt County and is listed below:

Name	Phone

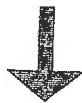

DO YOU NEED ADDITIONAL RESOURCES STORED ELSEWHERE?

NO

YES

Go to  
14

Arrange for pickup and delivery of additional resources

Additional resources may include any emergency management owned resources stored at alternate locations.

These items may include sandbags, cots, blankets, floodlights, public address system, communications equipment, etc.

A list of resources, locations and access procedures should be kept with this document.

**See the County LEPC supply list - refer to the County resources list (Annex 10, Tabs A & B).**

**Those Tabs include accessing the medical surge and hazmat response trailers.**

HAVE YOU COMPLETED ITEMS 1-13, AS REQUIRED?

**NO**

Return and complete items 1-13

**YES**

Now go to the Hazard Annex describing the incident you are involved with

**NATURAL HAZARDS:**

- 1 - Earthquake**
- 2 - Flood**
- 3 - Extreme Weather**
  - Winter Storm/Freezing
  - Drought/Extreme Heat
  - Thunderstorm
  - High Winds
- 4 - Pandemic**
- 5 - Volcano Eruption**

Annexes 1-5 (in bold)

**MANMADE HAZARDS:**

- 6 - Hazardous Material Release/Spill**
- 7 - Acts of Terrorism**
- 8 - Mass Casualty / Major Accident**
  - Aircraft Crash
  - Fire-Structural/Wild land
  - Utility Failure
  - Space Object Re-entry
- 9 - Civil Disorder**

Annexes 6-9 (in bold)

Submitted on 1/13/26

MeShell Young, LEPC Chair

## Evacuation Planning

After a major earthquake, before a flood, or during a large-scale incident such as a hazardous material release/spill or wild land fire that requires an evacuation of affected residents, a procedure must be available to coordinate the large movement of people into safe areas. This safe movement must be methodical and offer protection from the incident. Evacuations are conducted when lives are in imminent danger within a potentially hazardous area. Movement of those populations in danger is a preventative or reactive measure and will be typically conducted as a last resort due to the tremendous logistic effort and will draw significant manpower resources to execute a successful event.

### Purpose

The purpose of this Tab is to assist Lander County officials in alerting residents, notifying support functions, and initiating actions for the safe movement of large number of residents.

### Preparation

**Preparing for a large-scale evacuation must consider who is to be evacuated, where evacuees to will be placed, how accountability will be determined for the evacuees, and when they will begin evacuating.**

#### 1. Who will be evacuated?

The incident will determine the affected area, its residents and the critical need for the evacuation in moving residents to safety. Expect evacuees to resist movements due to a greater fear in leaving than in the danger, attachment to companion animals, or inability to protect personal property. The safety of the residents is the goal.

#### 2. Where will evacuees be located?

Depending on the incident, the size of the area and number of evacuees, Lander County schools will be the best option given the space and habitability. However, a large-scale movement may require coordination with surrounding counties to evenly distribute residents and minimize the impact in neighboring counties. The largest challenge is to account for each evacuee at every location.

#### 3. How will each evacuee be accounted for?

Assembly areas will collect evacuees. Support staff can list each evacuee, assign a location, and place the evacuee on a designated vehicle for transfer to the shelter. Support staff must receive the list of arriving evacuees and ensure receipt of each evacuee. Once evacuees are settled at the shelter, status must be reported to the Logistic or Administration Sections daily. The largest challenge in accountability is the voluntary evacuee who departs Lander County without notifying local officials.

4. When will the evacuation commence and terminate?

A time phased sequence in assembling evacuees and transporting them can be easily accomplished if continuous communications are maintained between the assembly area and each shelter. Returning residents will be similarly challenging. The key in executing a successful evacuation operation is to establish expectations by providing clear guidance to the evacuees and evacuators.

**Execution**

Once the decision is made by the County Commission to evacuate residents from certain areas, alerting those residents as quickly as possible is imperative for a smooth operation. The Emergency Operations Center (EOC) should be activated prior to execution. The EOC must:

- Ensure transportation assets and fuel, if necessary, are ordered for those evacuees without transportation;
- Coordinate manpower resources and submit requests for additional manpower resources from neighboring counties, as necessary;
- Monitor the incident progression providing for potential changes into the evacuation operation;
- Coordinate with State and Federal agencies as well as volunteer organizations, as necessary, for resources or specific requirements;
- Identify special populations who may require additional assistance and assign support;
- Ensure shelter facilities are prepared to accept evacuees;
- Monitor the flow of evacuees; and
- Track individuals from assembly areas, if necessary, to designated shelters.

**Note: Tracking evacuees may include those residents who self-evacuate to other locations beyond the County. Staff must obtain contact information for recall purposes.**

**Alert/ Notification**

Lander County intends to initially notify those residents in broadcasting messages through their public address system from the Sheriffs vehicles and follow up with a door-to-door inventory of residents. Any Emergency Broadcast System (EBS) message to residents should contain pertinent elements of Annex 11 (Communications) in directing residents to tune into, as an example, KVLV (FM 99.3 / AM 980 radio) or KOLO (Channel 8 television - Reno) for details. Those details in the broadcast may include, but are not limited to:

- Current and anticipated emergency situation
- Identify the geographic location of the incident and effected area(s)
- Rationale for the evacuation based on the anticipated situation
- Time to commence evacuation
- Location of the assembly area or shelter facility
- Evacuation routes from the affected areas (to minimize congestion at potential road intersections or choke points)

Carry the minimum number of items, but necessary items such as limited clothing, prescriptions, and special hygiene products (i.e., diapers, toothbrush, etc.)  
Provide guidance in handling pets

### Special Populations

**Special populations in Lander County must be identified in advance** since they are most likely to require special assistance in the event of a natural disaster, hazardous materials release or other emergency incident. Organizations must have sufficient notification if sensitive populations must move from care facilities such as Battle Mountain Nursing Home at the hospital. This notification must be directive in nature. Direction must include the reason for the movement; the location of the specific shelter the population is to be moved to; and expected duration of the move. Lander County may request transportation assets through the school district. If necessary, schools, hospital and other care facilities are strongly encouraged to develop movement plans since child/patient accountability and integrity must be maintained by each facility or school. The medical facility will also possess the knowledge for the specialized care necessary to accommodate the individual in their care. **The hearing and sight impaired populations must be identified in advance for possible evacuation, if required.**

The City of New Orleans revealed many coordination and process gaps during Hurricane Katrina in 2005. Most special care facilities did not possess the resources to transfer those people or coordinated services to execute such a transfer. Many hospitals and senior adult living facilities expected the City / County to assist in evacuating and moving those populations to a shelter. Fortunately, in Lander County, a smaller population will reduce the demand for transportation and shelter facilities. **However, an uncoordinated and inefficient evacuation will place a large demand on personnel resources in assisting with the movements.**

The County must coordinate and control any evacuation efforts to avoid exceeding the capacity or the capability of a specific shelter. Some shelters may not be accessible or structurally sound (if following an earthquake) given the size and scale of the incident. Shelters should be determined on a case-by-case basis.

### Assembly Areas

Assembly areas can be used to gather evacuees and provide transportation to the shelter. The assembly area should accommodate a large number of vehicles to minimize vehicle congestion in and around the shelter. The assembly area should also be a safe area from the incident itself. The assembly area, if necessary, may include, but not limited to:

Establishing a check-in point to obtain name, address, next of kin contact information, and special needs determination. Once checked in, refugees should offer information on:

- o The assigned shelter location;
- o Expected services and meal schedule at the shelter location; and
- o Special instructions as the situation warrants

Ensuring security to direct vehicles and convey a controlled atmosphere during the process (security personnel should rotate, but maintain a continual presence to minimize damage or theft threat)

Establishing limited medical support to handle potential health issues  
When the incident has been mitigated and unaffected residents are able to return to their homes, they must check out through the assembly area to maintain accountability of all persons.

### **Shelters**

Each shelter must establish procedures for the orderly flow of people into and throughout the facility. Each site must represent a safe, secure living environment on a temporary basis. Each shelter may include, but not limited to:

- Habitability inspection prior to designation ensuring utilities are fully functional
- Direct voice communication capability with the EOC
- 24-hour visible security, medical, and administrative support
- Meal schedules
- Hourly/daily refuse pick up inside the facility
- Periodic reports (hourly, every 4 hours, daily) on the status of the situation
- Radio broadcasts, as feasible
- Telephone capability to allow communication between the evacuees and other concerned family members
- Periodic visits from doctors, crisis counselors and/or spiritual representatives to evaluate the physical and emotional condition of the evacuees

### **Communication**

The EOC should obtain reports from the IC on the incident mitigation progress and report those changes to the shelters. Affected areas must be known to avoid releasing residents into an area where the home has been severely damaged or totally destroyed. The list of evacuees with contact information should be informed as soon as possible. Information should be obtained in directing affected residents to disaster recovery resources.

### **Recovery**

Once the incident has been sufficiently mitigated, County Commissioners can authorize residents to return to their homes. Undamaged dwellings or buildings must be determined through an inspection to ensure habitability and integrity of each structure. This inspection should include utilities to visibly determine functionality such as no downed power or telephone lines and broken water, gas or sewer systems.

If the area is suitable for families to return, evacuees from the inspected area can be released from the shelter, transferred to the assembly area, if used, and checked out of the process. The IC/EOC may wish to broadcast a message for residents who left the immediate area into neighboring counties. The message should offer a telephone number for residents to contact a team providing procedures in the process of returning to the area.

Structures affected by the quake may require a long term habitability plan. This habitability plan may need to include those families who evacuated the County. Support to these evacuees (now refugees) must continue until each individual has returned home in a safe, habitable dwelling.

designated alternate in the Sheriff's absence. The LEPC assumes planning and preparedness responsibilities as directed by the Lander County Commissioners.

2. Input will be solicited from those agencies having assigned responsibilities under this plan. Evidence of coordination is maintained on file with the LEPC Chairman.

### **Plan Review and Maintenance**

1. This plan will be reviewed by the LEPC, at least annually, and updated/re-written in its entirety every four years to ensure the plan supports the County's changing needs and compatibility in synchronizing the response effort. Any changes resulting from this annual review will be published and distributed to entities holding this plan.

2. This plan may be modified as a result of natural disasters, hazardous materials releases/spills, or major accidents post-incident analyses and/or post-exercise critiques. Proposed changes shall be submitted in writing to Lander County LEPC. These changes shall be published and distributed to agencies holding this plan.

3. This plan may also be modified any time responsibilities, procedures, laws, rules, or regulations pertaining to hazardous materials release/spill or natural disaster response changes. Those agencies with assigned responsibilities under this plan are obligated to inform Lander County LEPC when changes occur, or are imminent. These changes will be published and distributed to agencies holding this plan.

4. Per the Nevada State Emergency Response Committee (SERC) Policy 8.1, "LEPCs, the primary grantees, are required to submit an updated hazardous materials emergency response plan, a completed NRT-1 form, along with minutes of the LEPC meeting indicating review and acceptance of the plan updates, and an update of the LEPC Level of Response and Resources Capability Questionnaire by January 31st of each year for approval by the SERC. Notification of deficiencies, if any, will be made to the LEPC chair."

### **Evaluation and Training**

#### **Evaluation**

1. Lander County LEPC will coordinate and facilitate post-incident analyses and critiques following incidents and exercises.

2. An after-action report may be prepared by Lander County LEPC and distributed to those agencies involved in the incident or exercise.

#### **Training**

1. Initial and refresher training will be consistent with the provisions of 29CFR1910.120. Lander County LEPC will notify holders of this plan of training opportunities associated with emergency response and designated Emergency Operations Center staff.

2. Individual agencies are responsible for maintaining training records. Lander County LEPC will ensure training records are updated in accordance with state and federal directives. The LEPC Chairman will also maintain copies of training records.
3. This plan will be exercised at least annually. Lander County LEPC may conduct emergency response exercises in conjunction with the Lander County annual exercise schedule to facilitate improvements in response planning, county coordination, integration and training.
4. Agencies having assigned responsibilities under this plan must ensure their personnel are properly trained to implement these responsibilities.
5. The exercises may be held semi-annually for a minimum of two years to accelerate initial training, and as written standard operating procedures (SOP) are being completed. Independent observers will be used to review and critique each exercise. After two years or when initial training/SOP's are complete, one exercise must be conducted annually without prior notice to responding agencies.

### Coordination

Lander County Emergency Services Director (Sheriff) will participate in the County LEPC. This participation will ensure consistency and continuity in emergency response activities. Lander County Emergency Services Director (Sheriff) will closely coordinate activities with the Lander County Emergency Operations Center (EOC) to avoid duplicating efforts in mitigating an incident, if an EOC is required. EOC activities must be directed by trained and experienced personnel. The LEPC may consider a process in designated EOC staff members.

### Initial Response Function

The Initial Response Function addresses specific hazards in the BOP to initiate actions based on the situation and the type of incident.

Initial notification of an incident will most likely begin with the Lander County 911 Dispatch. The dispatchers will obtain as much information as possible from caller to direct the level of response for the situation (i.e., fire, police, medical assistance, etc.). Depending on the incident location, radio tones or pager activation will commence to initiate emergency responder deployment. When the first response teams arrive on-scene, the situation must be immediately assessed and contained with available resources at the given location.

Depending upon the size and complexity of the situation, the on-scene leader may need to assume command and establish his/her position as the Incident Commander (IC). Trained first response teams will likely act decisively in understanding the situation to determine the resources necessary and available in order to mitigate the incident. First response teams will recognize the dangers, as will the IC, and match available capabilities to minimize the risk. This
